## Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 8-11, drawn to a nucleic acid that encodes SEQ ID NO: 2 (GLUTX) and methods for detection thereof, classifiable in class 536, subclass 23.1.
- II. Claims 4-7, 12-15, drawn to GLUTX polypeptides and methods of detection thereof, classifiable in class 530, subclass 350.
- III. Claims 16-19, 22-23, drawn to a method of modulating GLUTX polypeptide and methods of identifying inhibitors, classifiable in class 435, subclass 7.1.
- IV. Claims 20, 21, 24-28, 32, drawn to a method of modulating hexose uptake and methods of treatment via GLUTX nucleic acid expression modulation and methods of identifying inhibitors of GLUTX gene expression, classified in class 514, subclass 44.
- V. Claims 29-31, drawn to diagnostic methods for determining a disorder related to GLUTX mutation or aberrant expression, classifiable in class 435, subclass 6.
- 1. The inventions are distinct, each from the other because of the following reasons:

  Inventions III and IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

inventions are different methods utilizing different method steps and different material components that lead to different end results.

- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are different chemical compounds composed of different subunits that posses different chemical properties. The nucleic acid of group I encodes the polypeptide of Group II, however the polypeptides of Group II can be made by different means such as isolation from a cellular extract.
- 3. Inventions I and II, and III-V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the inventions of Group I and II can be used in different methods. For example the nucleic acids of group I can be used in *in situ* localization assays and the proteins of Group II can be used to produce antibodies against GLUTX protein..
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art because of their recognized divergent subject matter, restriction for

examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the

fee required under 37 CFR 1.17(I).

7. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Sean McGarry whose telephone number is (703) 305-7028 (M-Th 6:00-

4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, John LeGuyader, can be reached on (703) 308-0447.

Certain papers related to this application may be submitted to Art Unit 1635 by facsimile

transmission. Papers should be faxed to Art Unit 1635 via the PTO Technology Center Fax

Center located in Crystal Mall 1. The faxing of such papers must conform with the notices

published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December

28, 1993) (see C.F.R. 1.6(d)). The Art Unit 1635 FAX number is (703) 308-4242 or (703) 305-3014. NOTE: If Applicant does submit a paper by Fax, the original signed copy should be retained by applicant or applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED so as to avoid the processing of duplicate papers in the Office.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
